

INSTALLATION

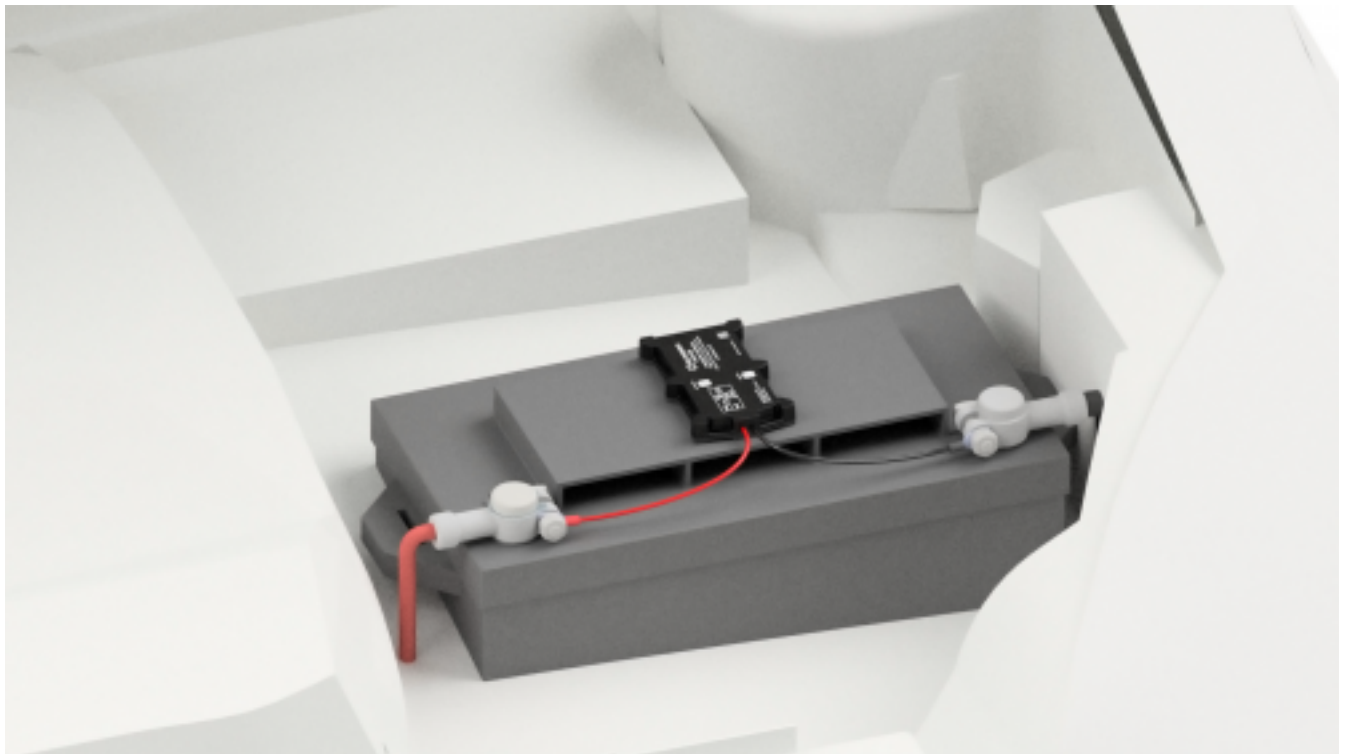

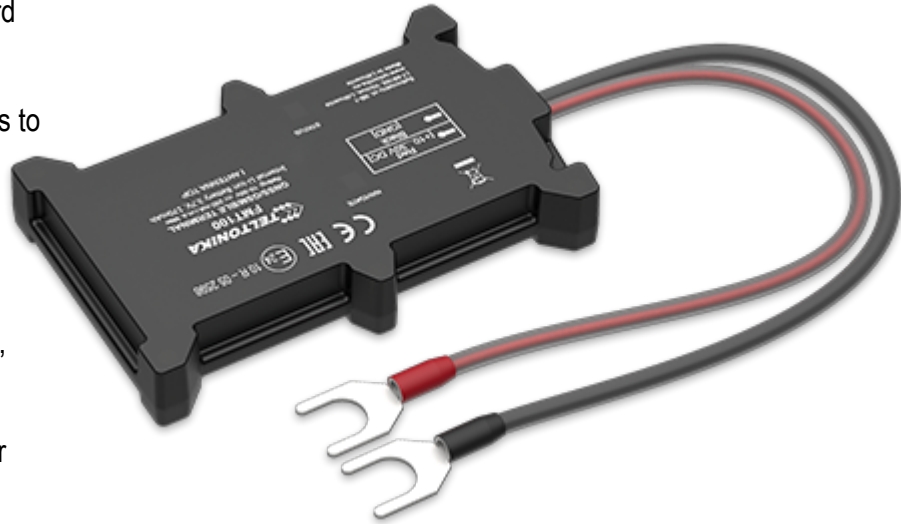

The Teltonika FMT100 GPS tracker is straightforward to install to any 12 or 24 volt vehicle battery.

Simply connect the BLACK and RED fork connectors to the vehicle battery terminals.

The **BLACK** wire connects to the Negative terminal and the **RED** wire connects to the positive terminal.

To connect the wires, loosen the battery terminal nut, slide the fork under the nut and tighten.

Once the device is connected, peel off the red sticker backing and fix to the vehicle battery.
